

COCOA BEANS FLY TO CHOCOLATE FACTORY IN THE STATES

One of the output descriptions for SQS is to facilitate the export and import of commodities in compliance with all existing agreements and international obligations. One noticeably expanding overseas market is the Cocoa beans (*Theobroma cacao*) to the United States of America. In recent months the figures shows a sharp increase in the exportation of this product. The exporter is looking forward into exporting more in the future for the purpose of producing chocolates. It is indeed a good opportunity for the cocoa growers to earn extra money and is indeed a market to sustain.

Farewell MAF27

Down memory lane at the official transfer of MAF 27 to former Quarantine ACEO by SQUIP team leader John Burton

SQS has finally said goodbye to one of its old faithful assets. The MAF27 vehicle was one of the outputs from the Samoa Quarantine Improvement Project (SQUIP) that was funded by the Australian government. The years of transporting staff to and from Faleolo airport made MAF27 a well known figure on the road and to many passers-by to the airport
